Comment from me.

I believe that many companies do not quite understand many things at this time. We need to reorganize their actions. And analyze what you create. 1 second and you already have a cancellation cult.
Quick understanding and response will help you make the product that will be used by many. Convenience for everyone.

**UI / UX Design**

HTML

CSS

JavaScript

Python

C++

Java

The line of my learning and work is up to creating projects. You can also see the dates and location of training.

Caten.io
📅 December 2021 - January 2022
📍 Omsk, Russia

Project for the sale of photographs. Founded by myself. To purchase copyright on a photo, an in-person meeting must be scheduled.

VKNext
📅 December 2020 - April 2022
📍 Omsk, Russia

Project to expand the site vk.com Worked as a tester, studied the great functionality of the site and its shortcomings.

Siberian Regional Business School (College)
📅 September 2020 - May 2023
📍 Omsk, Russia

Very large and complex training. Studied programming languages such as: python, c++, java. Studied the basics of vector and raster graphics with the basics of programming.

Middle School
📅 September 2009 - May 2020
📍 Omsk, Russia
